

SupplyPro's patented SupplyPort is a powerful Web-based data management engine. Users can access real-time information or perform administration from any Web-enabled device.

SupplyPort collects and processes transaction data, controls inventory levels and manages automatic replenishment.

The SupplyPort gives you the power to manage your Point-of-Use program by providing the ability to:

- Manage your data
- Enable secured user access to materials
- Check inventory levels
- Manage replenishment and reordering according to custom parameters and business rules
- Scheduled reports are automatically emailed to key personnel and members of your supply chain
- See Item-Level, Plant-Level and Enterprise-Level data views
- Optimize inventory turns
- Easily extract data
- Eliminate unaccounted tool loss

Take Full Advantage of Your Inventory Data with SupplyPort Reporting

SupplyPort gives management the opportunity to look at inventory data like never before. Decisions can now be made based upon real-time, accurate information.

Stock-Level Alerts Reduce Stock-Outs

With SupplyPort, management can receive automated alerts when stock levels fall below a pre-defined level, orders are late or when other critical events occur.

Information Where You Need It

A variety of traditional and wireless connectivity options are available to move data easily from the device to the SupplyPort securely over the Internet. SupplyPort also creates seamless data flows to existing information systems.

- Flat file interface capabilities
- Easily interface with existing systems
- ERP and procurement systems automatically receive transactional information
- Send automatic updates from ERP/HR systems to SupplyPort for changes to work orders, job numbers, department changes, etc.

Manage Inventory Levels with **Accurate, Timely Reports** from SupplyPort

With SupplyPort you have the visibility to effectively manage consumable inventory with almost 100 different reports in drill-down format that can be accessed anytime, anywhere. Operations managers, as well as finance departments, can set up report emails on a regular schedule for efficient cost and inventory management. The information is right at your fingertips for better decision-making.

Replenishment Management

SupplyPro automated replenishment configurations provide control and flexibility to accommodate whatever restock requirements may exist per vendor, product type and even machine! Choose day(s) of week, time of day, minimum dollar value, and many other combinations. The System will automatically generate and send refill orders by fax, email, or through an interface – when, where and how you want it delivered!

Financial Accountability

Full visibility with a few clicks to all historical refill orders sent from SupplyPro. Managers and suppliers can see summary views, and drill into a product name to see individual order dates and quantities ordered.

Part #	Product Name	Total # Of Orders	Qty Ordered	Amount Ordered	Restock Qty	Restock Amount
4	TAPE, PLASTIC, GREEN	1	1	\$0.00	2	\$0.00
DRILL BITS, #20	DRILL BITS, #20	1	5	\$12.50	5	\$12.50
GRINDING DISCS, LARGE	GRINDING DISCS, LARGE	1	5	\$0.00	9	\$0.00
SAFETY GLASSES, ENCON	SAFETY GLASSES, ENCON	2				
TAP1643	ELECTRICAL TAPE	1				

Order Date	Order Qty	Order Amount
6/23/2006 6:53:51 AM	5	\$50.00
6/23/2006 10:00:17 AM	5	\$50.00

Consumption Reports

Finance and operations now have the ability to track cost accounting by department, item number or job number, easier and faster than ever before.

Multiple drill-downs available to view individual transaction details.

Data Protection Peace of Mind... SupplyPro Enlists Secure, World- Class Facilities to Ensure Your Data's Protection and Availability

SupplyPro understands that connectivity and the ability to get your data is important, but we also realize the critical need for peace of mind regarding the protection of your data. In response we have taken great measures to ensure data security and availability.

SupplyPro's SupplyPort is co-located at the AT&T Internet Data Center in Irvine, CA with complete redundancy at their Dallas, TX facility. The facility consists of the very best in security, power and cooling with complete (N+1) redundancy for all systems to ensure "near-zero" downtime to the SupplyPort.

Reliable Access to Your Data

AT&T's strategic partnership with CISCO Systems has enabled them to design a network for the customer with maximum uptime and complete redundancy with no single points of failure in the core network.

- Fully meshed and redundant network that is powered by flagship CISCO products
- Dual entrance and dual path OC-48 access to diverse AT&T Internet MegaPOPs
- Dedicated or burst-able bandwidth solutions along with various speed options
- Built in power redundancy to support continuous availability of the SupplyPort

In the Event of an Emergency....

In the unlikely event that data recovery is required, SupplyPro utilizes an online system to provide recovery services from multiple back-up sources. This provides us with the ability to retrieve data on a same day basis for our customers versus the delays associated with traditional tape back-up storage systems.

SupplyPro has engaged EVault, the leading provider of secure, online backup and recovery services. The data is encrypted and backed up to a pair of mirrored servers – located at SupplyPro's headquarters and at the secure data center on a daily basis.

Stored safely off-site, the data is professionally managed and available online at all times for immediate recovery. From a single management console, EVault's InfoStage application enables us to easily configure and automatically run dual backup tasks to storage vaults in multiple locations, ensuring that data is always safe and secure.

About SupplyPro

SupplyPro delivers the technology and support you need to implement Point-of-Use automation and control programs with confidence to improve productivity and drive costs out of your business. Our consultative services provide all of the support and project management expertise you need to make your implementation a success. We stand by you every step of the way. **For more information visit www.supplypro.com or call 1.858.587.6502 or 1.513.671.4933 x. 107.**
