

First Tier Automotive Supplier

APPLICATION

Personal protection equipment managed with 6 SupplyBays in 3 different plant areas

OBJECTIVES

The objectives were to:

- Put under control the excessive use of personal protection equipment (PPE)

- Minimize travel and lost productivity

INITIAL STATE

Personal Protection Equipment was distributed from central location

Each employee was responsible for retrieving their own items

Usage was high and productivity was lost due to travel time to a single location

CURRENT STATE

Replenishment orders are automatically placed to the PPE supplier through SupplyPort

Items are shipped to the storeroom specifically designated for the SupplyBays. Storeroom personnel restocks

With easier access and control, PPE consumption has dropped 50%

Purchase orders for PPE have been reduced/eliminated

SupplyPro technology can be applied in many different ways to accomplish a particular client's objectives. This Application Profile is part of a series on real-world application successes that have been implemented with our clients.
